

description: >

UI/UX design intelligence skill — gọi khi cần quyết định về style, màu sắc, typography, pattern layout, accessibility, chart type, hay stack-specific guidelines (Avalonia, WPF, React, Next.js, Flutter, SwiftUI...). Cung cấp database 84 styles, 192 palettes, 74 font pairings, 98 UX guidelines, 161 reasoning rules trên 22 stacks — không suy đoán, query data.

Skill: UI UX Pro Max — Design Intelligence

Skill được cài từ repo [nextlevelbuilder/ui-ux-pro-max-skill](https://github.com/nextlevelbuilder/ui-ux-pro-max-skill) (v2.11.0, MIT License).

Files data + scripts: `.claude/skills/ui-ux-pro-max/`

Xem workflow đầy đủ: `.claude/skills/ui-ux-pro-max/SKILL.md`

Khi nào gọi skill này

Gọi **bất kỳ khi nào** task liên quan đến:

- Xây dựng UI mới (page, component, form, dashboard, landing page)
- Chọn style / màu / font / spacing cho project
- Review UI về accessibility, UX, consistency
- Implement animation / chart / icon
- Viết code UI theo framework cụ thể (Avalonia, WPF, React, Flutter, SwiftUI...)

Bỏ qua khi task chỉ là backend/logic, API design, infra, hoặc non-visual script.

Lệnh cơ bản (chạy từ thư mục gốc project)

Query domain cụ thể

```
# Tìm style phù hợp
python .claude/skills/ui-ux-pro-max/scripts/search.py "saas dashboard modern" --domain style

# Tìm palette theo loại sản phẩm
python .claude/skills/ui-ux-pro-max/scripts/search.py "fintech banking" --domain color

# Tìm font pairing
python .claude/skills/ui-ux-pro-max/scripts/search.py "elegant premium" --domain typography

# Tìm guideline UX / anti-pattern
python .claude/skills/ui-ux-pro-max/scripts/search.py "form validation feedback" --domain ux

# Tìm chart type phù hợp
```

```
python .claude/skills/ui-ux-pro-max/scripts/search.py "time series realtime" --domain chart
```

Stack-specific guidelines (ƯU TIÊN dùng khi code Avalonia / WPF / Desktop)

```
# Avalonia – compiled bindings, MVVM, DataGrid, TreeView, DI...
python .claude/skills/ui-ux-pro-max/scripts/search.py "compiled bindings x:DataType" --stack avalonia
python .claude/skills/ui-ux-pro-max/scripts/search.py "DataGrid TreeView" --stack avalonia
python .claude/skills/ui-ux-pro-max/scripts/search.py "MVVM dependency injection" --stack avalonia

# WPF
python .claude/skills/ui-ux-pro-max/scripts/search.py "data binding command" --stack wpf

# React / Next.js
python .claude/skills/ui-ux-pro-max/scripts/search.py "rerender performance" --stack react
python .claude/skills/ui-ux-pro-max/scripts/search.py "server component rsc" --stack nextjs

# JavaFX (nếu cần)
python .claude/skills/ui-ux-pro-max/scripts/search.py "tableview layout" --stack javafx
```

Design System Generator (dùng khi bắt đầu dự án mới)

```
# Sinh design system hoàn chỉnh (pattern + style + color + typography + anti-patterns)
python .claude/skills/ui-ux-pro-max/scripts/search.py "beauty spa wellness" --design-system -p "ProjectName"

# Sinh và lưu vào file (persist xuyên session)
python .claude/skills/ui-ux-pro-max/scripts/search.py "saas analytics" --design-system --persist -p "MyApp" --output-dir "."

# Với design dials (variance 1-10, motion 1-10, density 1-10)
python .claude/skills/ui-ux-pro-max/scripts/search.py "dashboard" --design-system --variance 8 --motion 5 --density 7
```

Domain tham chiếu nhanh

Cần gì	--domain	Ví dụ query
-----	-----	-----
Loại UI style	style	"glassmorphism dark premium"
Màu sắc theo ngành	color	"healthcare medical"
Font pairing	typography	"clean modern sans"
Pattern landing page	landing	"saas hero cta"
Best practices UX	ux	"accessibility keyboard nav"
Chart phù hợp	chart	"comparison bar pie"
Icon recommendations	icons	"navigation outline minimal"
GSAP animation	gsap	"scroll reveal stagger"
React performance	react	"memo virtualize"
App/native guidelines	web	"touch safe-area bottom-nav"

Lưu ý khi chạy trên Windows

```
# Dùng python thay vì python3
python .claude/skills/ui-ux-pro-max/scripts/search.py "<query>" --domain style

# Nếu encoding lỗi
python -X utf8 .claude/skills/ui-ux-pro-max/scripts/search.py "<query>" --domain style
```
